MADRIX NEO

The NEO is a small, reliable, and easy to use DMX512 USB interface. You can use this device to send or receive DMX512 signals using MADRIX. One MADRIX software license for 512 DMX channels is already included in the box.

In three simple steps you are ready to go:

1. Download the MADRIX software for free at <http://www.madrix.com>
2. Plug in the MADRIX NEO into your computer
3. Enjoy!

With its eye-catching style the MADRIX NEO does more than just look good. It is made from light but solid metal and features a very robust design with high precision. If you pick it up, you will immediately notice the high quality.

- DMX512 OUT or IN function with a 5 Pin XLR connection
- Plug and Play USB 2.0 interface
- Power over USB
- High quality
- Solid case
